WORK EXPERIENCE

Lead Software Engineer Pepsico

2022 - Present

Hyderabad

Achievements/Tasks

- Built Retail360, an AI-powered analytics platform delivering actionable insights on major retail partners like walmart to Pepsico stakeholders, streamlining sales and operations decision-making.
- Built a RAG-based Q&A system enabling users to upload documents and retrieve accurate, context-grounded answers using LLMs and semantic search.
- Developed a multi-agent AI system to autonomously detect pipeline failures and triage bugs, reducing incident response time by 10% via automated alerts.

Senior Software Engineer Pegasystems

2021 - 2022

Hyderabad

Achievements/Tasks

- Architected a high-throughput, event-driven email microservice on the Pega platform, leveraging Kafka and asynchronous messaging to enable real-time, scalable communication across enterprise workflows.
- Engineered end-to-end case management workflows on the Pega platform, automating complex business processes and reducing manual handoffs across cross-functional teams.

Software Development Engineer Amazon , Oracle

2020 - 2021

Hyderabad

Achievements/Tasks

- Developed the Impact application, a serverless analytics platform built with AWS Lambda, DynamoDB, and React, empowering leadership with real-time operational insights into Amazon's last-mile supply chain processing..
- Engineered a full-stack product change notification platform at Oracle using Spring Boot and React (TypeScript), empowering stakeholders to seamlessly schedule and manage product updates enterprise-wide.

Software Engineer Teradata, TCS

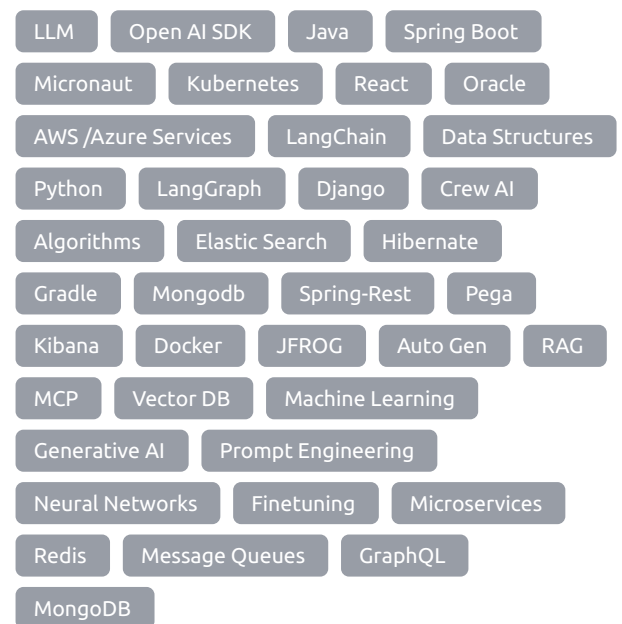

2015 - 2020

Hyderabad, India

Achievements/Tasks

- Engineered the Vantage Analytics Development Environment, a rich client IDE built on Eclipse plugins and fragments, empowering Teradata customers to author and execute custom analytical functions on the fly.
- Built a Python Django microservice automating the installation of analytical functions on Vantage cloud clusters, reducing provisioning time by 42% and eliminating manual setup steps.
- Built a real-time premium calculation engine using Spring Boot, processing complex insurance pricing logic on the fly and reducing quote generation time by 25%.
- Single-handedly automated the fragile, manual build process.

SKILLS

CERTIFICATIONS

Microsoft

- Microsoft Certified: **Azure AI**
- Microsoft Certified: **Azure Data**
- Microsoft Certified: **Azure Fundamentals**

Oracle

- Oracle Cloud Infrastructure 2020 Certified **Architect Associate**
- Oracle Cloud Infrastructure Foundations 2020 Certified Associate

Pega

- Pega Certified **System Architect (CSA)**

EDUCATION

Computer Science Engineering (B.Tech) JNTUK University College of Engineering, Vizianagaram

08/2011 - 05/2015
Vizianagaram, India
